Summary

Aspiring Software Engineer with strong software engineering and backend development skills. Experienced in building intelligent applications and scalable AI systems, with a passion for solving real-world business challenges through practical, reliable, and production-ready solutions.

Technical Skills

- **Languages:** Python, SQL
- **Databases:** MySQL, MongoDB, FAISS, ChromaDB, Pinecone
- **Technologies:** ReactJS, TailwindCSS, FastAPI, REST APIs
- **AI/ML & GenAI:** TensorFlow, Scikit-learn, Transformers, LangChain, LangGraph
- **Tools & Platforms:** Git, Docker, Postman, AWS, Google Cloud, Kaggle

Education

B.Tech, Artificial Intelligence & Machine Learning *Sri Shakthi Institute of Engineering and Technology* 2023 – 2027
• CGPA: 8.5/10.0

Higher Secondary *Sri Aanoor Vidyalaya Matric Higher Secondary School* 2022 – 2023
• Percentage: 86.17%

Experience

Amazon ML Summer School Mentee *Amazon* Remote, Aug 2025

- Developed and optimized modular Python programs with clean coding practices and efficient data handling.
- Engineered end-to-end ML pipelines for preprocessing, execution, and evaluation with focus on performance.
- Collaborated in industry-style workflows including debugging, optimization, and reviews under mentorship.

Software Project Intern (Virtual) *Infosys Springboard* Aug-Nov 2025

- Developed an emotion-based music recommendation system using machine learning and Spotify API.
- Built a FastAPI backend and React frontend with RESTful APIs for personalized music recommendations.
- Worked in an Agile environment following testing and deployment-ready development practices.

Projects

Multi-Agent Document Intelligence Platform *Python, LangGraph, FastAPI, ChromaDB* 📄 Source Code

- Engineered a 7-agent LangGraph pipeline with conditional routing to classify and action business documents.
- Integrated RAG retrieval via ChromaDB and enforced type-safe entity extraction using Pydantic schemas.
- Built autonomous action agents interfacing with CRM, email, and risk-scoring tools for workflow automation.

LLM Guardrails Gateway *Python, FastAPI, Presidio, HuggingFace, Groq, Pydantic* 📄 Source Code

- Engineered a dual-phase LLM guardrail proxy enforcing PII anonymization, jailbreak, and toxicity filtering.
- Implemented 36 regex patterns with LLM-as-a-Judge and Presidio NLP to block injection and spoofing.
- Designed a hot-reloadable YAML policy engine with safe evaluation and auto-retry for zero-downtime use.

Multi-Agent AI Knowledge & Decision System *Python, FastAPI, LangChain, FAISS, Redis* 📄 Source Code

- Developed a multi-agent AI platform for intelligent research, retrieval, and context-aware decision-making.
- Designed a LangChain-based agents pipeline combining RAG, Tavily search, and a Critic agent for responses.
- Integrated dynamic query routing, Redis memory, and FastAPI to deliver production-ready AI workflows.

Achievements

- Completed Intel Industrial Training, gaining hands-on exposure to industry practices, engineering workflows, and collaborative problem-solving through an industry-oriented training program
- Finalist at Horizon'25 Hackathon for developing an AI-powered agriculture assistant app and participated in multiple national-level hackathons including Google GenAI Exchange and ISRO Hackathon.
- Selected among the top 3000 students nationwide for Amazon ML Summer School, a competitive program on advanced machine learning.

Certificates

- Intel Unnati Industrial Training (October to December 2025) - Intel Unnati
- Retrieval Augmented Generation - DeepLearning.ai (Coursera)
- Introduction to Generative AI – Google Cloud (Coursera)
- Agentic AI with LangChain and LangGraph - IBM (Coursera)
